TECHNICAL SKILLS

LANGUAGES

JavaScript, TypeScript

FRONTEND

React, Next.js, Tailwind CSS, Styled Comp., Framer Motion

BACKEND

Node.js, Express, REST API, JWT, Zod

DATABASES

MongoDB, Mongoose, PostgreSQL, Prisma

TESTING & TOOLS

Jest, Vitest, Supertest, Git, Postman

ARCHITECTURE

Layered Arch., MVC, RESTful, Clean Code

LANGUAGES

Arabic	Native
French	Professional
English	Professional

EDUCATION

Self-Taught Developer

Focused on real-world engineering practices, system design, and building maintainable business applications end to end.

PROFESSIONAL SUMMARY

Fullstack developer building operational systems and SaaS products with clear architecture, tested business logic, and real deployment experience. I ship end-to-end — from database design and API architecture to frontend UI — and document engineering decisions through structured case studies at **kanata-system.vercel.app**.

PROJECTS

Electro Abidin eSystem

2025 · DEPLOYED

Case Study ↗ *Private repo — demo on request*

Full retail operations system replacing manual stock checks, paper tracking, and slow checkout for a real electronics store.

- Built FIFO batch costing for accurate profit reporting based on real purchase prices
- Connected stock visibility directly to checkout — sales staff verify availability in real time
- Separated workflow state from financial truth via dual-write pattern (Sale + SalesTransactionItem)
- Delivered invoicing (FACTURE / BON DE VENTE), VAT handling, returns, and warranty tracking

Next.js, React, JavaScript, MongoDB, Mongoose, Styled Comp., Zod, JWT, Jest

Elmoussaaif Abdelghafour Brand

2025 · PRODUCTION

elmoussaif.com ↗ *Client-owned repo*

Personal brand website built and delivered for a client — live in production. Full ownership of architecture, CMS, authentication, and deployment.

- Designed CMS with drag-and-drop ordering, image optimization (Cloudinary + Sharp), and admin dashboard
- Built JWT + bcrypt authentication with role-based access control
- Implemented multilingual content management and structured SEO metadata for discoverability

Next.js 16, TypeScript, MongoDB, Tailwind 4, Framer Motion, Cloudinary, Zod

MediTrans Core

2025 · IN DEVELOPMENT

GitHub ↗

SaaS platform for medical transport and home care operations in Morocco. Phase 1 foundations complete, active development.

- Designed modular architecture with service, repository, and schema boundaries per domain
- Built deterministic 7-step pricing engine with immutable snapshot persistence
- Vitest test coverage for pricing, invoicing, and payment modules

Next.js 14, TypeScript, PostgreSQL, Prisma 5, Zod, NextAuth, Vitest
